

Project Summary

CTG is working with the New York State Department of Health (DOH) to create dynamic, user friendly health data visualizations and expand on CTG's work with DOH last summer, in which interns created data visualization prototypes for publicly available data designed to help consumers better evaluate the quality of health care services provided by NYS' managed care plans.

Working with interns once again, this new project will produce a wide range of deliverables for DOH, including:

- Refining, expanding, and finalizing the publication of visualizations prototyped in 2015
- A full production online tool that will provide visualizations for publicly available data designed to help consumers better evaluate the quality of health care services provided by NYS' managed care plans
- An evaluation to assess any efficiencies or cost savings achieved by implementing the new process

The project funded through Funding Opportunity Number PR-PPR-14-0055-01-00 from the U.S Department of Health and Human Services (HHS), Centers for Medicare & Medicaid Services.
