Creating and Maintaining Proper Systems for Electronic Record Keeping
Dec 2002
E-Government is changing the way government conducts business and captures records created during that business. This paper provides a framework for developing new e-government systems that foster electronic records management.

XML: A New Web Site Architecture
Sep 2002
As Web sites have grown in size, complexity, and prominence, site management has become a growing concern for Webmasters, system administrators, and organizations as a whole. This paper discusses how XML technology simplifies the entire site management process.

Finding Our Future: A Research Agenda for the Research Enterprise
Jul 2002
The research enterprise has grown into a $112-billion endeavor involving thousands of organizations representing every scientific discipline and field of knowledge. This report discusses the challenges facing that research enterprise, offers a vision of the ideal research enterprise, and lays out a supporting research and action agenda to help achieve it.

The Future of E-Government
Jun 2002
This paper is based on testimony presented to the New York City Council on a sustainable definition and model of electronic government.

Information Access in an Electronic World: A policy panel summary transcript
Mar 2002
Policies about online government information were a focus of attention following September 11th. This document provides a thought-provoking examination of how information policy issues were reassessed in response to those events.
