II. Copyrighted Work: Open Government Portfolio Public Value Assessment Tool (PVAT) ("the Work")

III. Description of Work The Open Government Portfolio Public Value Assessment Tool ("PVAT"), developed by the Center for Technology in Government at the University at Albany, gives users an approach to making better- informed decisions about their portfolio of open government initiatives. Using PVAT in the recommended way provides detailed, structured information about the public value results that can be expected for an initiative. That information can then support decisions about the mix of initiatives in a portfolio and how to adjust the mix to enhance the value of the portfolio as a whole.

IV. Acknowledgement and Disclaimer The "Open Government and Public Value: Conceptualizing a Portfolio Assessment Tool paper" was based upon work supported by the National Science Foundation. Any opinions, findings, conclusions or recommendations expressed in the material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation.
